The Mothers' Milk Bank of Florida is a non-profit organization founded in 2011 to collect and process human milk and distribute it to premature and critically ill babies when their mother's own milk is not available. This milk is obtained by prescription only.

Donor human milk is urgently needed, but without a Florida milk bank, these babies may not receive this lifesaving resource. If you are interested in providing financial support to help establish the only milk bank in Florida, please visit our website.
